

Silt Control Fence

Geotextile fabric material composed of woven polypropylene fabric with pre-weathered hard oak stakes. It is designed to collect eroded sediments transported in storm water run off. Other uses include perimeter controls in both residential and commercial construction projects.

Custom sizes & stake spacing is available to meet most DOT specifications - per request

Tensile Strength:	ASTM D-4632	161 x 250
Elongation:	ASTM D-4632	20 / 25 %
Puncture:	ASTM D-4833	81 lbs
Mullen Burst:	ASTM D-3786	321 psi
Trapezoidal Tear:	ASTM D-4533	63 / 105 lbs
UV Resistance:	ASTM D-4355	95 %
(AOS) 3:	ASTM D-4751	.235 / 50 US Std Sieve
Water Flow Rate:	ASTM D-4491	13.7 gpm / sq ft

PACKAGING INFO

Size:	3' x 100' / rolls
Weight:	26 lbs / roll
Quantity:	36 Rolls / Plt
